Technical Data Sheet

UV/Visible/LED Curable Multi-Substrate (Plastics) General Bonder

PRODUCT DESCRIPTION

Incure Uni-Weld[™] 1403 UV/Visible light curable is a low viscosity, acid-free industrial grade adhesive used for bonding of many plastics, such as polycarbonate and various grades of thermoplastic elastomers. Matched with an appropriate UV lamp, it cures completely in seconds and fluoresces under blacklight to aid inspection. Incure 1403 is ideal for bonding of plastics used in data-storage devices requiring high peel and bond strength on difficult-to-bond substrates.

 If you are unable to fully cure this product for some reasons, pls email us for assistance with your curing information. Below are the curing parameters:

 UVA (320-400nm) = 1,000 mW/cm²
 UVB (290-320nm) = 320 mW/cm²
 UVC (290-220nm) = 30 mW/cm²
 VUV (400-700nm) = 960 mW/cm²

 Note: This product has been thoroughly tested to cure with F200P™ UV Flood Lamp. Intensity wavelengths (shaded) are crucial for curing this product. All measurements are made with EIT UV PowerPuck II.

SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf-Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remained covered when not in use. Product should be stored in a dark cool place of 2°C to 20°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data-sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces.

EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure Medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to the test requirements. Please consult Incure Support Team for assistance, if your devices are subjected to more than one sterilization cycles.
