UV/Visible/LED Curable Multi-Substrate (Plastics) General Bonder

PRODUCT DESCRIPTION

Incure Uni-Weld™ 1453 UV/Visible/LED curable adhesive is an acid-free, multi-substrate medium viscosity bonder. High in clarity and cures in seconds, it is an excellent choice for cushioning in between different hard surfaces such as tile coating. Highly elongating, it provides excellent vibration isolation capability. Used as a coating or an encapsulant, it exhibits excellent moisture and temperature resistance. Incure 1453 is a very high strength plastics bonder and it is also often used for bonding of many different types of components on flexible circuits.

SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf–Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remained covered when not in use. Product should be stored in a dark cool place of 2°C to 20°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data–sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces.

EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure Medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to the test requirements. Please consult Incure Support Team for assistance, if your devices are subjected to more than one sterilization cycles.
