

# Ultra-Illumina™ 3511B

# UV/Heat Curable, Low Shrink High Quality PCBA Conformal Coating

# PRODUCT DESCRIPTION

Incure Ultra-Illumina<sup>™</sup> 3511B is a UL-compliant, 100% solids true UV light curable black conformal coating used on PCB assembly. It is designed for use in high volume spray system, does not clog valves as it contains no volatiles and is environmentally-friendly. With full cure, Incure 3511B forms a glossy and hard and resilient protective opaque coating of up to 600 microns thickness and works as a moisture barrier with excellent adhesion in harsh environments. Formulated to meet UL 746C, rated indoor/outdoor, to 120°C and 94V-0 flame class.

<sup>4</sup> Curing Distance is defined by the tip of light-guide or base of lamp housing to the bond area. All values are nominal with ±10%						

variation, with LED Flood Static Uniformity at ±78% and Dynamic Uniformity at ±90%. Recommended curing parameters in grey.

# CURING SCHEDULE FOR THIS PRODUCT

If you are unable to fully cure this product for some reasons, pls email us for assistance with your curing information. Below are the curing parameters:

UVA (320-400nm) = 5,000 mW/cm <sup>2</sup>	UVB (290-320nm) = 1,600 mW/cm <sup>2</sup>	UVC (290-220nm) = 150 mW/cm <sup>2</sup>	VUV (400-700nm) = 4,800 mW/cm <sup>2</sup>		
Note: This product has been thoroughly tested to cure with F200P <sup>™</sup> UV Flood Lamp. Intensity wavelengths (shaded) are crucial for curing this product. All measurements are made with EIT UV PowerPuck II.					

# SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf-Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remained covered when not in use. Product should be stored in a dark cool place of 2°C to 20°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data-sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces

# EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure Medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to the test requirements. Please consult Incure Support Team for assistance, if your devices are subjected to more than one sterilization cycles.

# NOTE

The data contained in this document are furnished for information only. We cannot assume responsibility for the results obtained by others over whose methods we have no control. It is the user's responsibility to determine suitability for the user's purpose of any production methods mentioned herein. INCURE will not be liable for any indirect, special, incidental or consequential loss or damage arising from this INCURE product, regardless of the legal theory asserted. INCURE recommends that each user adequately test its proposed use and application before repetitive use, using this data as a guide.
